

As Gigabit access becomes more prevalent, it will change the way ISPs manage Customer Premise Equipment and shift attention to the Entire Home Network. This talk will address the drivers, uses and challenges of Gigabit access in the home and why managing the in-home experience is vital for ISPs. We will also discuss the evolution of Wi-Fi and networking technology required to support this next wave of access, how to choose the right technology for your operation and how to manage it once deployed.
