

## **Panel: Regulatory Reflections**

Four intelligent and witty retreads from a previous era will talk about whatever pleases them to say on the following possible subjects, to which they are not confined:

- vertical integration of carriers with broadcasters
- the legislative review panel and its work
- cultural subsidies, NAFTA and Trump
- why the Commission is so wrong - or right - about forbidding resale of wireless services
- the future of the CRTC

The panelists did not agree with each other on all points when they were Commissioners, and they are unlikely to agree with each other at the ISP Summit. A stimulating discussion is guaranteed.
